DL800 7-Speed Dual-Clutch **Transmission**

High-Performance Transmissions

The Graziano™ DL800 7-speed dual-clutch transmission is ideally suited for high-performance sports car applications. It features a mechanical limited-slip differential with a high-efficiency, single-oil solution for the transmission, bevel gear, clutch, and hydraulic unit.

The dual-clutch transmission is installed in both the Audi R8 and Lamborghini Huracan. The base transmission is equipped with a Volkswagen mechatronic unit and dual wet clutch module, and it has been developed with several variants of ratios and an all-wheel drive option to meet all vehicle performance needs. The quality of this transmission perfectly matches the handling of a high-performance super sports car.
